How to define BOM(Bill of Material) for an item?

To make a new item using another item in HDPOS smart, follow the steps below :

1. Run **HDPOS smart**. Click on the **Set-Up** button in the main screen.

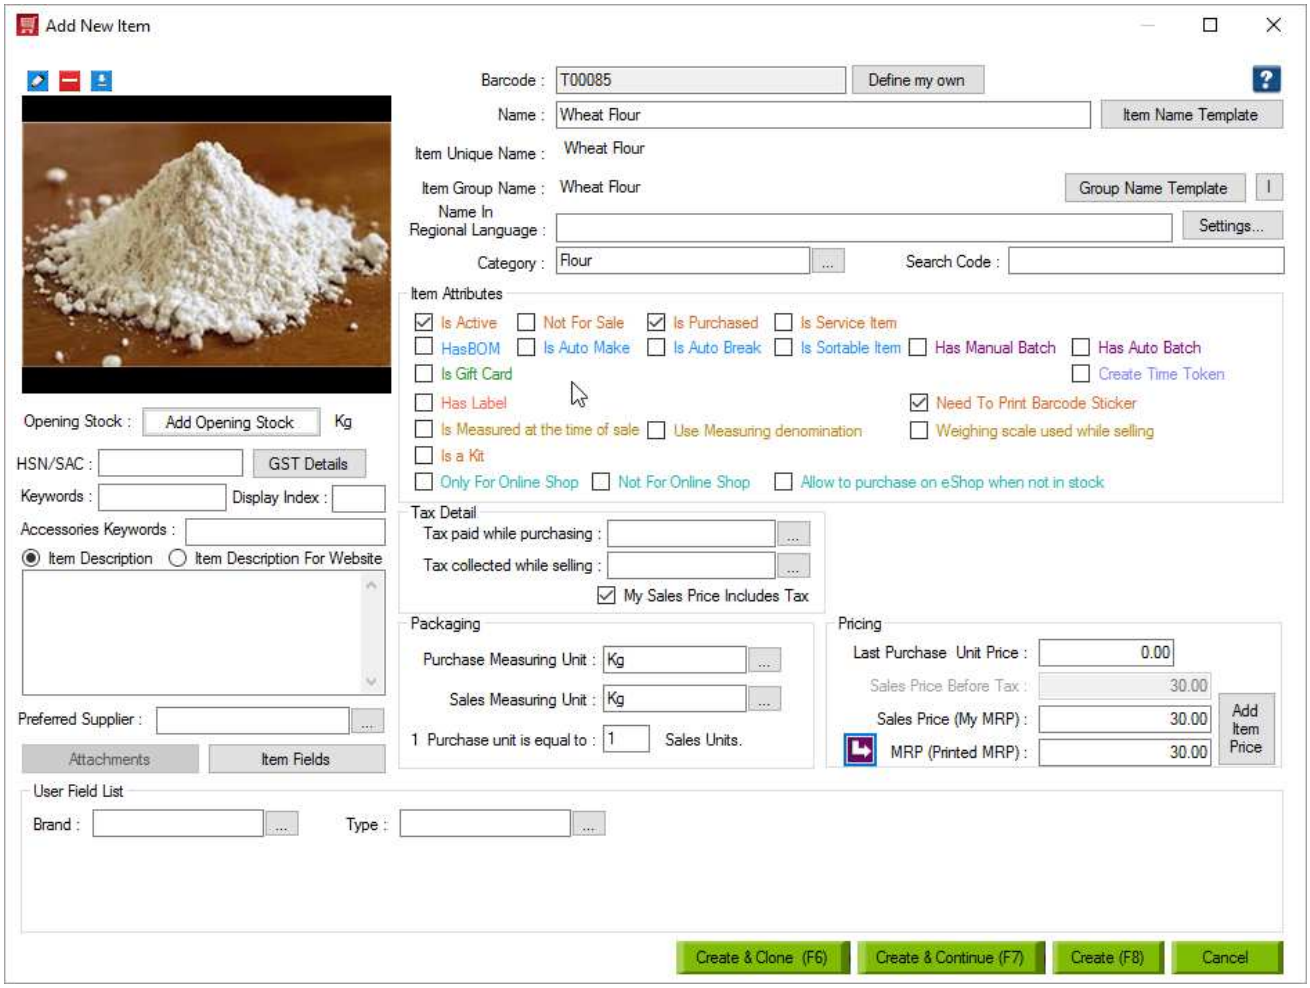

2. In 1st page of **Set-Up** screen, click on **Items**. From **Items** screen, click on **Add Item** button

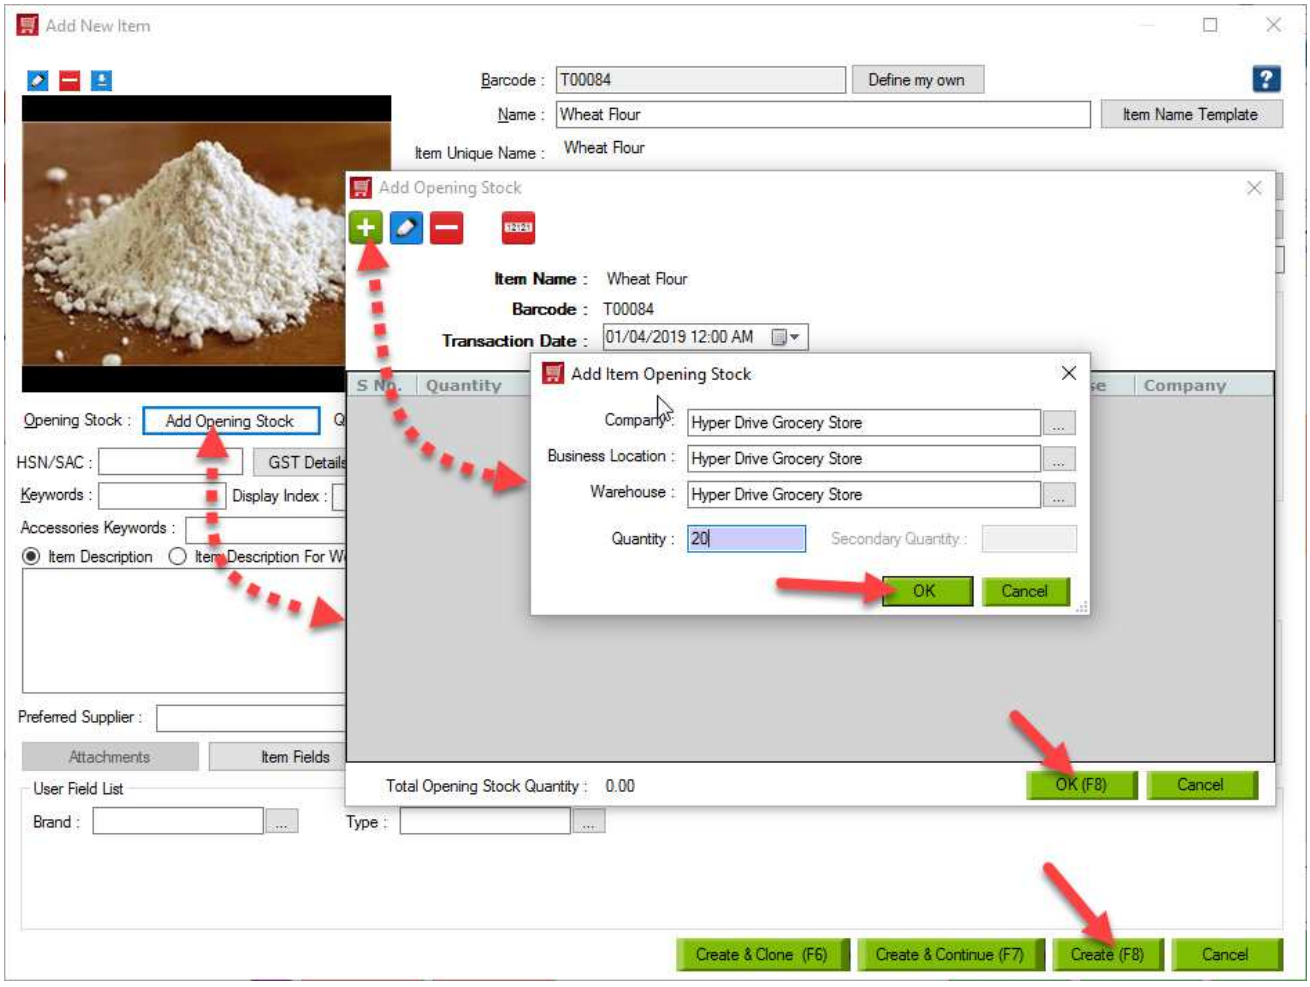

3. Add the item details and opening stock and click on **Create** button.

- This will be the item you will be using in order to create new items.

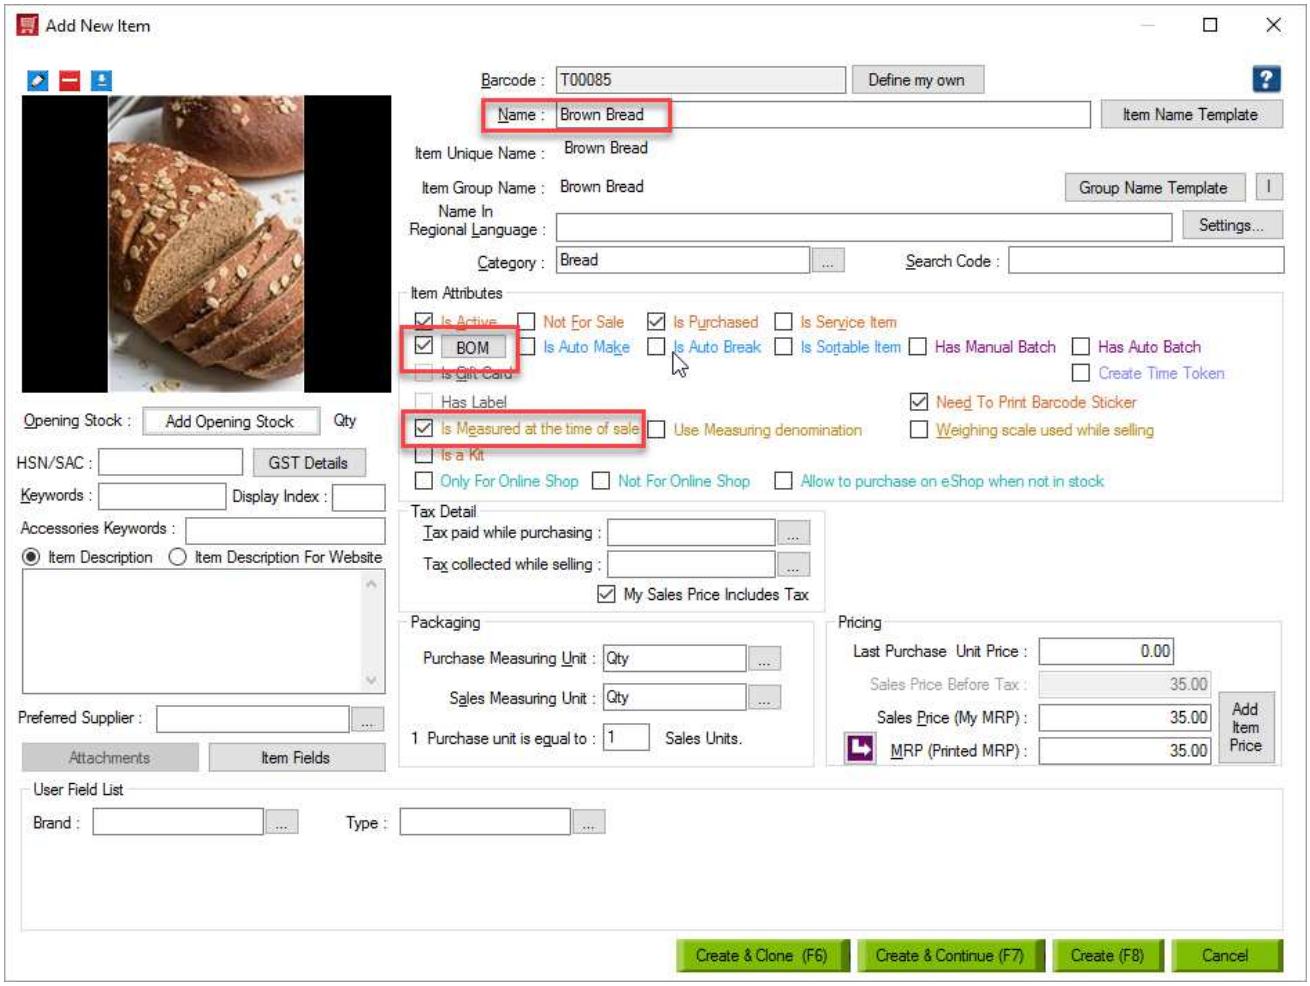

- Add the Opening Stock also for this item. You can also create a GRN to get the stock.

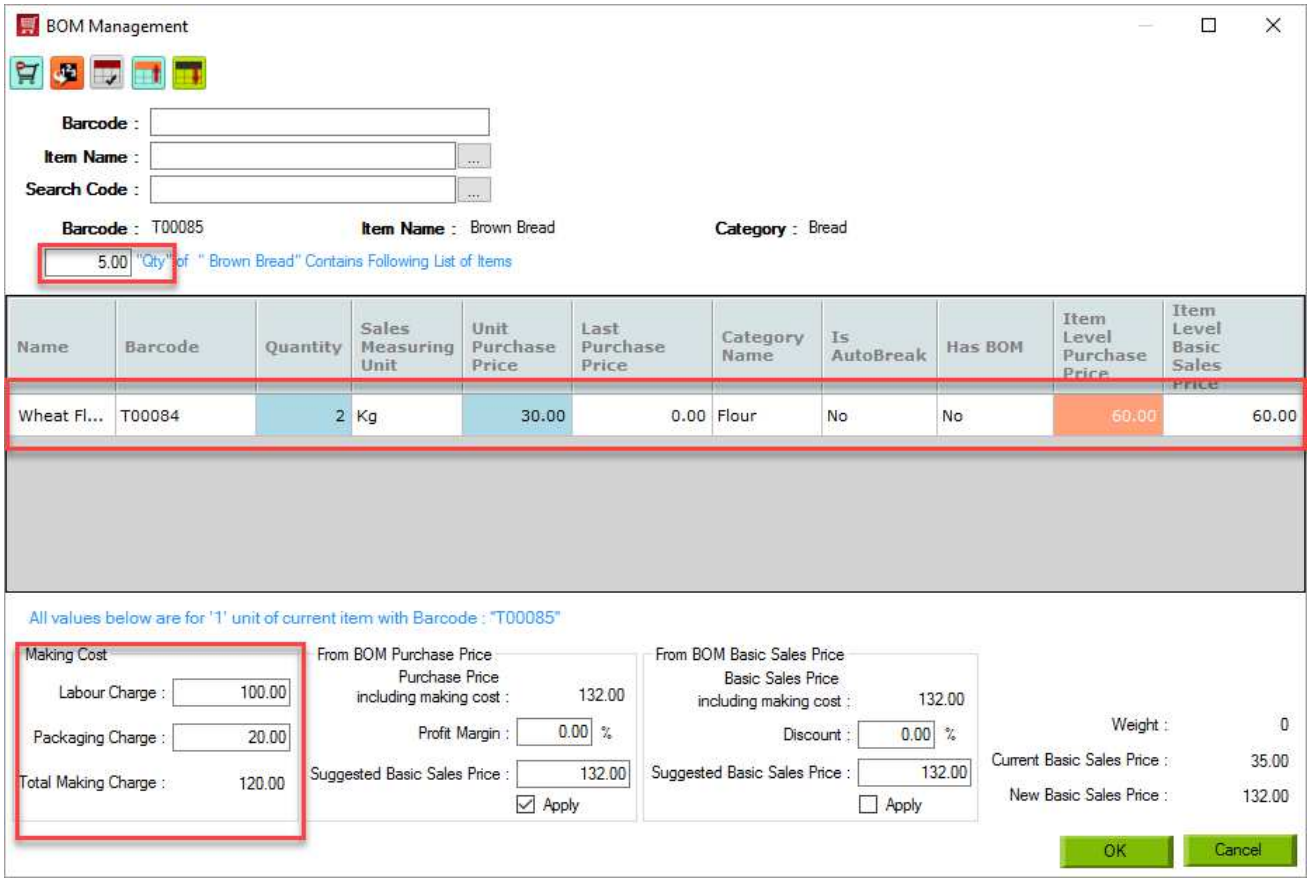

4. Click on **Add Item** button and add the new item name which you want to make.

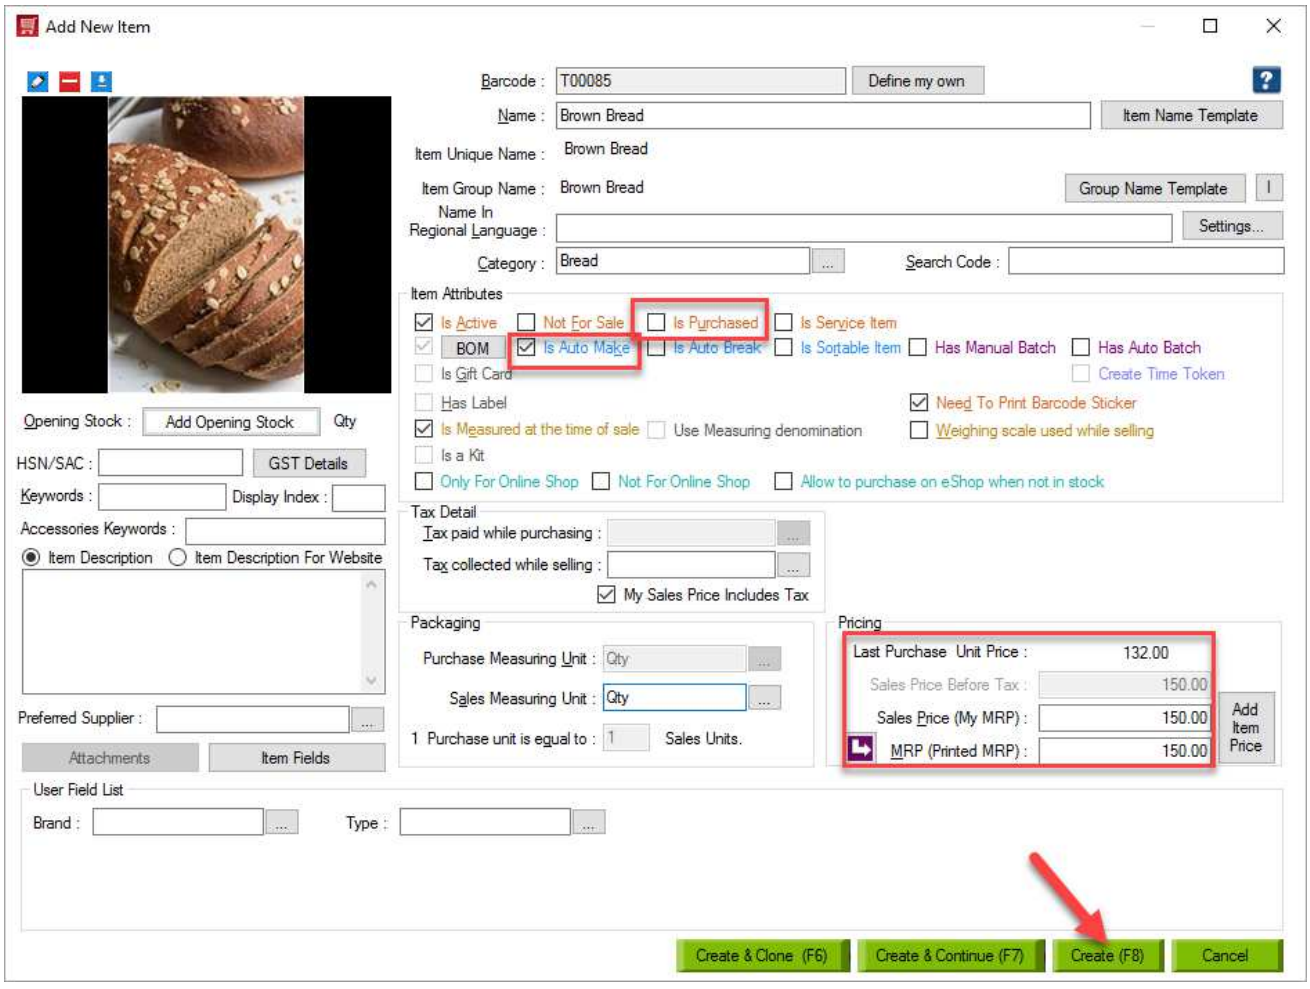

- Check the **Has BOM** checkbox.
- You will see the checkbox as a button **BOM**.

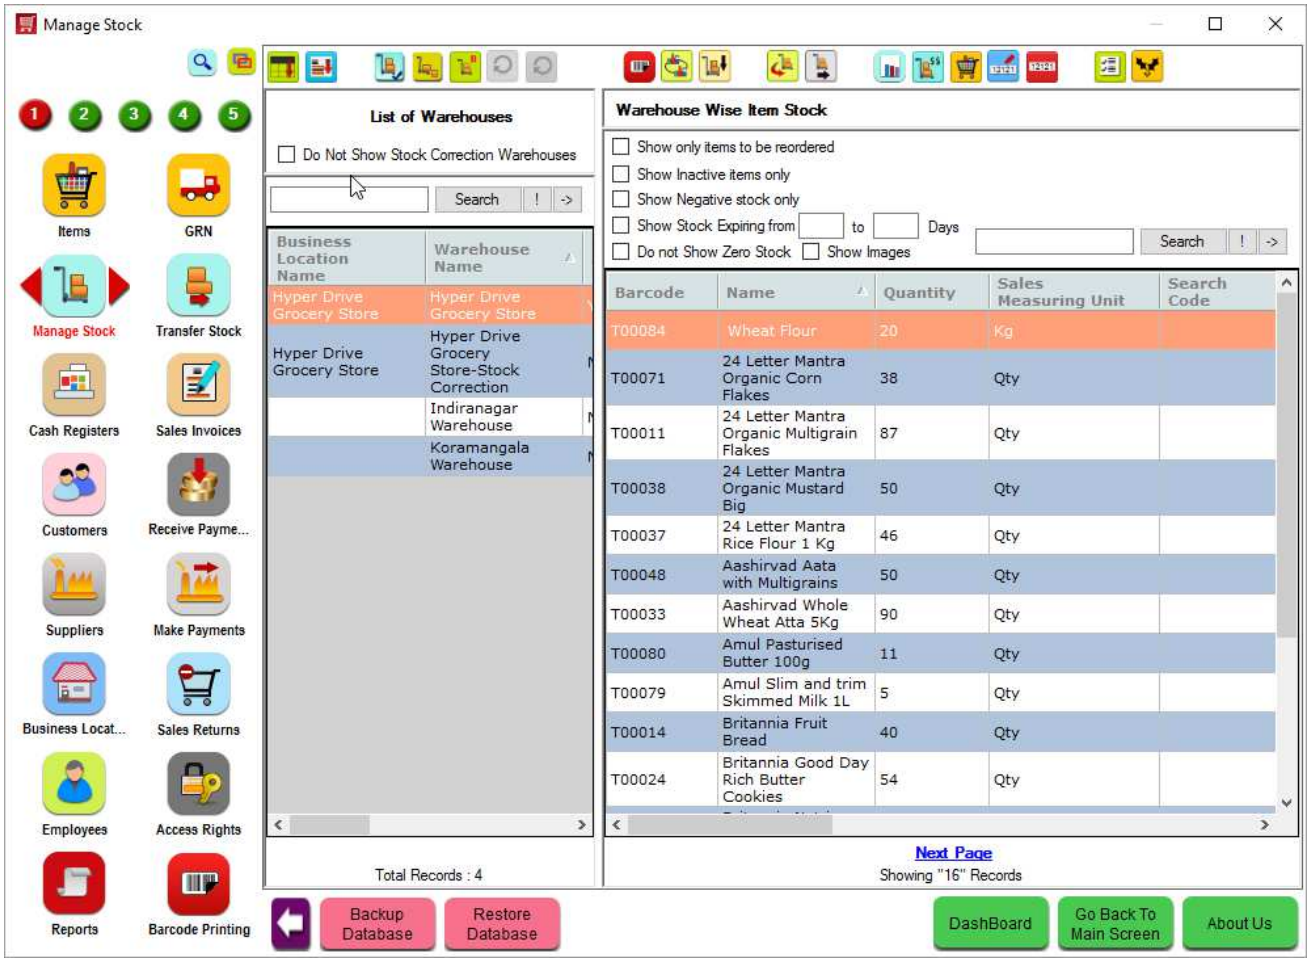

- Click on **BOM** button, you will see the **BOM Management** screen.
- Select the item which you will use to make this new item.
- Enter the **quantity** used to make it.
- Add any **Labor** and **Packaging charges** if you want and click on **OK**.

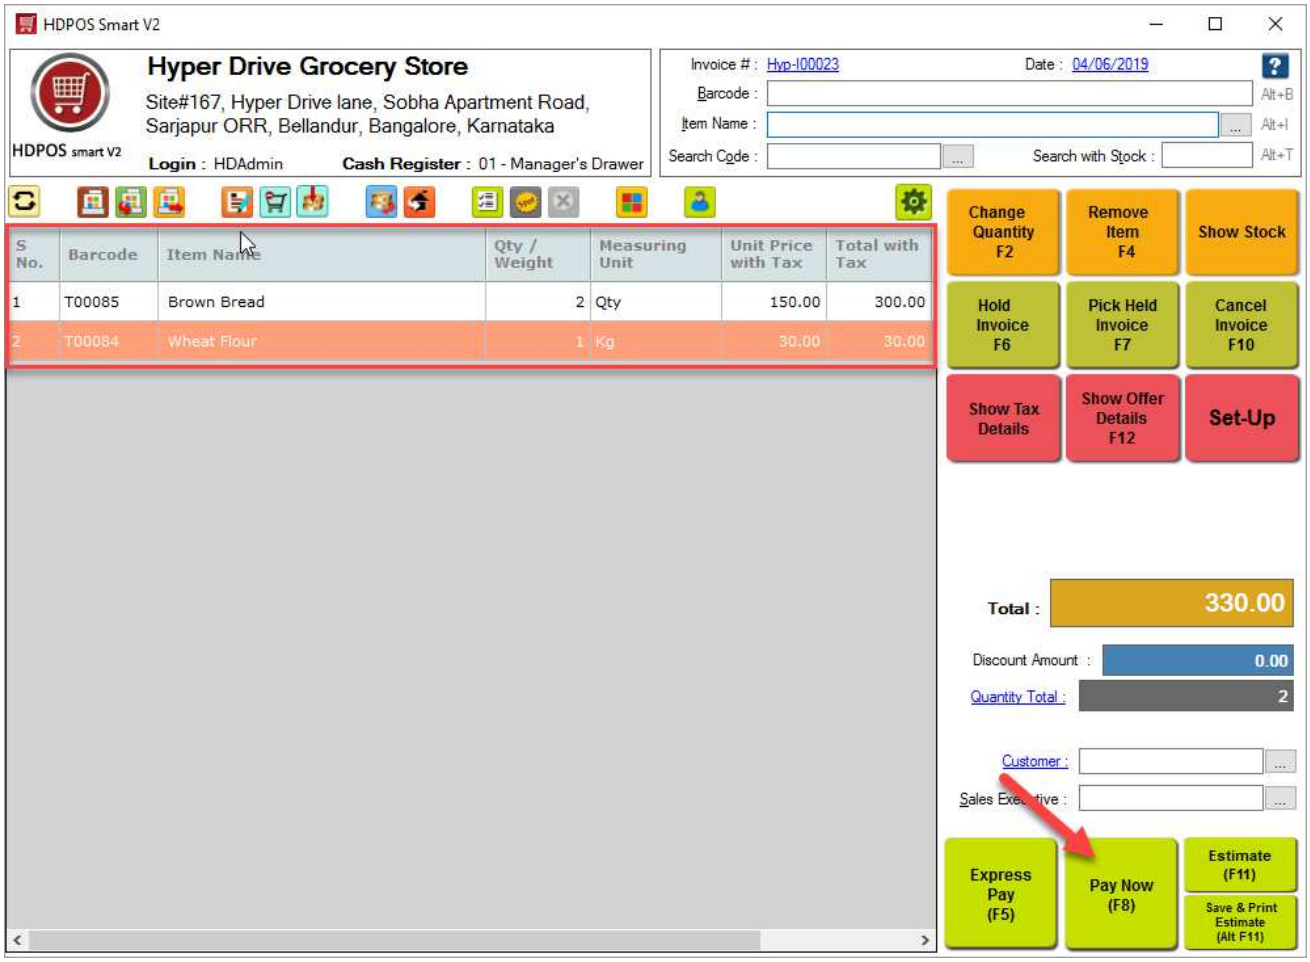

- Check the checkbox **Is Auto Make**.
- You can also uncheck the checkbox **Is Purchased** as you are making this item and not purchasing.
- Enter the **sales price** & **MRP** and click on **Create**.

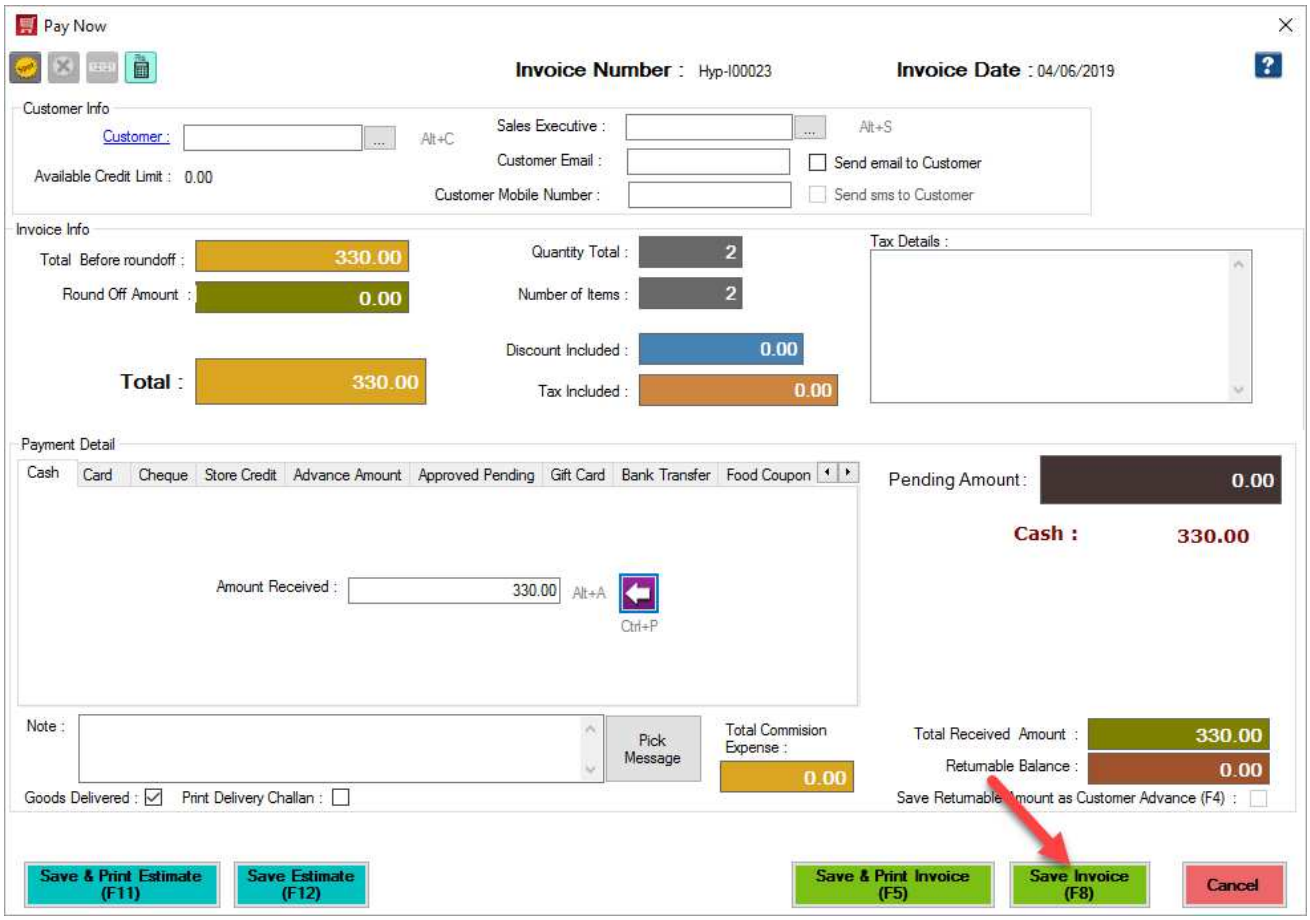

5. Check the stock of these two items from the 1st page -->Manage Stock -->Select the warehouse. As there is no stock of item with BOM, it is not displayed here.

6. Come back to the main screen and make an invoice with these two items. Click on **Pay Now**.

7. Enter the amount to be paid and save the invoice.

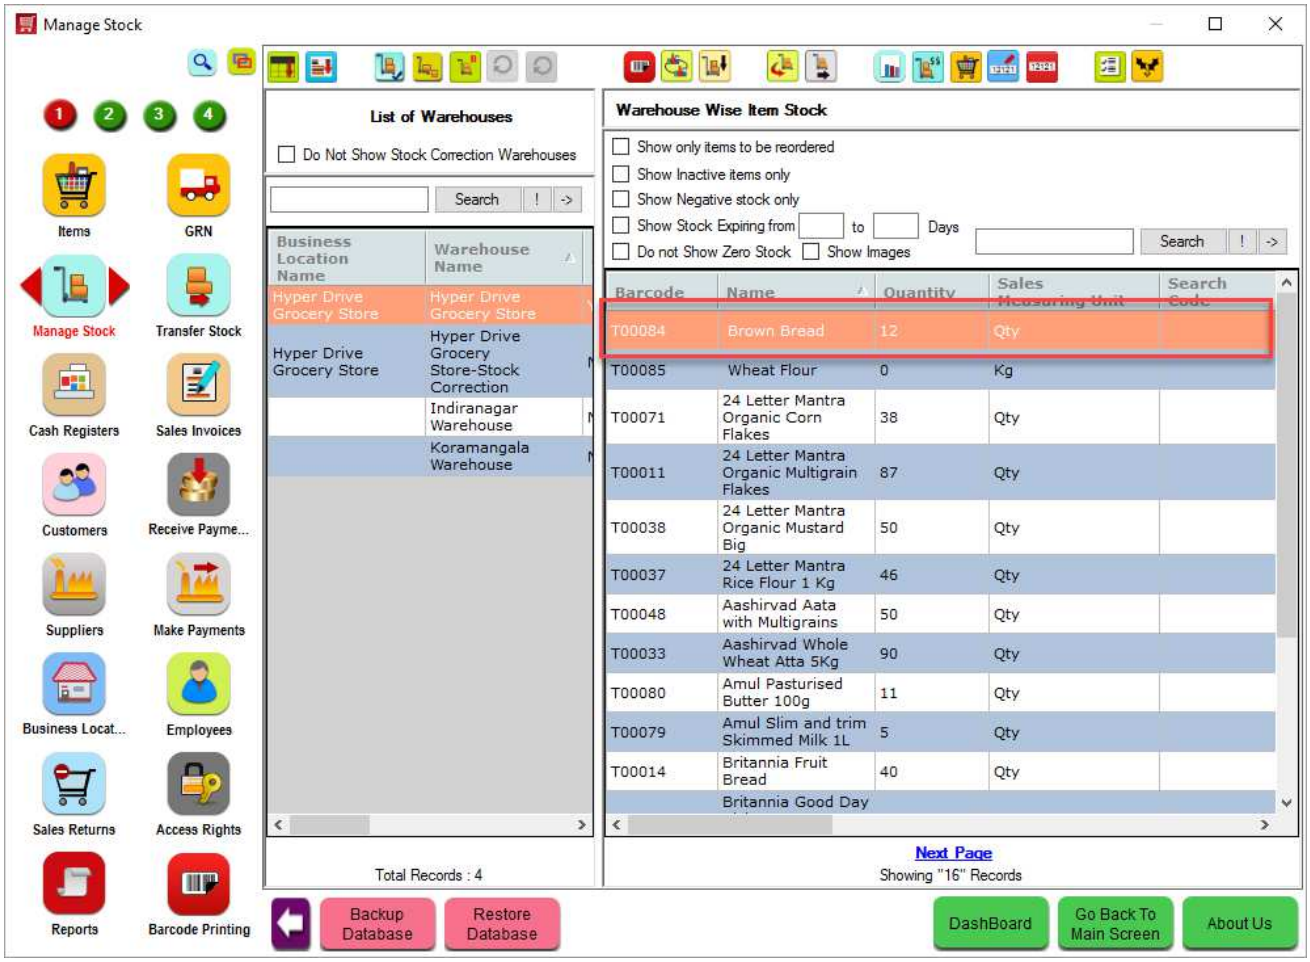

8. Go back to the **Manage Stock** and check the stock to see how much it has decreased. As the parent item (Brown Bread) didn't had any stock, the parent item is automatically made and stock reduced from child item

(Wheat Flour).

9. You can go back to main screen and sell Brown Bread, then stock will be reduced from the child item (Wheat Flour) as it is automatically made using child item.
