How to do data entry in HDPOS smart in Tamil language?

HDPOS smartV2 Tutorials

HDPOS smart is a very versatile application. We understand the need of our customers to have item names in a language familiar to them and hence we support the use of regional language.

To type in regional language you would need to have the font of that particular language installed on your machine.

In *HDPOS* Application, if you want to write the *item name* in **Tamil**; You need to follow the following steps.

Step-1: Install Tamil font in your System.

To install Regional font follow the below steps:

- Open any Browser (Chrome, IE, and Mozilla).
- Type http://www.bhashaindia.com/ilit/ in your Address bar.

 The below screen will open with Microsoft Indic Language Input Tool displayed on it. Select Tamil.

• Click on *Install Desktop Version*.

• This will open the below page with details of *System Requirement* and *Operating systems* supported by the selected language.

• Click on *Install Now* button displayed in the above screen to download the font and install it.

• Double click on Marathi.exe file and follow the given instructions to install the font.

Step-2: Select Tamil language in Control Panel – Regional and Language option

Once you have installed the font you will need to select the *Regional Language* in *Control Panel – Regional and Language* option.

Follow the below steps to do the same

• Go to Start button in your Computer & click on Control Panel.

• From the Control Panel options, select Regional and Language Option.

1	You chose to install the Arabic, Armenian, Georgian, Hebrew, Indic, Thai and Vietnamese language files. This will require 10 MB or more of available disk space. The files will be installed after you click OK or Apply on the Regional and Language Options dialog box.
	ОК

• Click on Apply button in *Regional and Language Options* screen.

Note: If your operating system is Windows XP you may be prompted for the Windows XP installation CD. (Please put the Windows XP CD and follow the steps as instructed to install the language tool)

• You may need to restart the computer to complete the language installation.

Step-3 – Select the Regional Language in which you want to type

• After restarting you will notice the **language bar** in your task bar.

• Click on the language bar to view the different languages installed.

• Select the **Tamil** language.

Step-4 – Open HDPOS smart and enter your item names in Tamil.

- Run *HDPOS smart.*
- From *Set-Up* go to *Item Manager*.
- Click on A*dd Item* option in the *tool strip*.
- When entering the item name ensure Tamil *language is selected and enter your item name.*
